

Primary Antibodies

Specificity, Performance and Confidence

Three words that can make or break an experiment

Our primary antibodies are purified using methods designed to retain affinity and ensure stability. They are tested in multiple application so that you can now get a complete story from extracellular staining of proteins to phosphorylation and signal transduction pathways, looking by ELISA, Western blot, flow cytometry or microscopy

Visit www.invitrogen.com to download the list of Primary Antibodies available

Buy now any of our extensive range of
Primary Antibodies at the incredible price of

250€
